

Lean Six Sigma Black Belt

Fall 2024

About the Program

The Black Belt Certificate program is designed for experienced practitioners with a Green Belt Certificate (or equivalent process improvement experience) who wish to achieve a higher level of Lean Six Sigma training by developing critical skills for leadership in enterprise-wide deployment.

In this instructor-led course, participants spend 90 hours in the classroom and 30 hours in the field applying the Lean Six Sigma methodologies. Students become grounded in the established Lean Six Sigma body of knowledge, facilitate a Black Belt project, and earn the credentials to be a Lean Six Sigma leader within their organization. This course is limited to 12 participants.

Fridays, 8:30 am – 5:00 pm

September 13, 20, 27

October 4, 11, 18, 25

November 1, 8, 15, 22

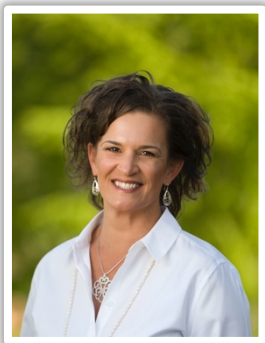

December 6 - Graduation

South Puget Sound Community College – Lacey
4220 6th Ave SE, Lacey, WA 98503

Program Cost: \$4,400

Instructor Sensei

Dr. Wendy Fraser has over 30 years of continuous improvement and organizational development experience. She taught at several universities helping hundreds of people earn their Black Belts, Green Belts, and White Belts in Lean Six Sigma. She is a skilled practitioner who has concrete experience and knows how to teach others to yield results.

This Program is Different

Our interactive class design emphasizes organization development, change management, leadership, systems thinking, strategic thinking, listening, teamwork, and communication skills. Most other Black Belt programs focus on tools and models. This program focuses on the whole system – the human system (social sciences, complexity science, leadership and human development) and how to engage with and change organizational systems (organization development, change management, strategic planning) all while improving outcomes (Lean Six Sigma methodologies).

"Wendy was wonderful. Her style of teaching (creating a learning lab) really took the learning of the class to a whole other level. This program was practical, deep, and relevant! This has to be the best class I have taken!"
